

# Solar Air Heating

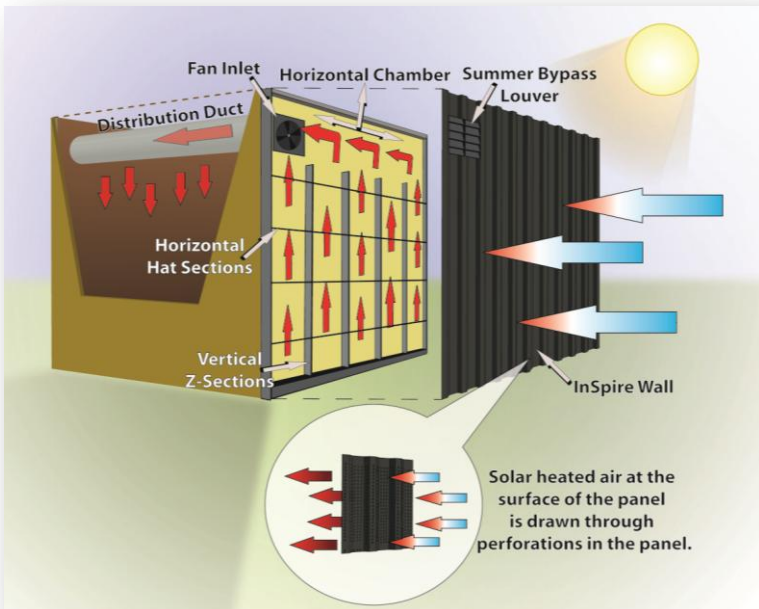

InSpire® at EcoPark, Pembroke, VA - USA.

InSpire® is a transpired solar air heating system that uses precision perforated metal panels to preheat ventilation air via solar energy. The warmed air can then be vented into the building or connected to a process dryer, to dry coffee, grains, fruits, wood, corn and many other products.

With InSpire® you can:

- Save Money
- Reduce Energy Consumption
- Earn LEED Certification Credits
- Improve Indoor Air Quality
